

# Yuvraj Kumar

## Software Engineer

yuvrajk.dev@gmail.com | +91 9304522218 | Patna, Bihar, India | [linkedin.com/in/yuvrajkumar01](https://www.linkedin.com/in/yuvrajkumar01)

[github.com/yuvrajk-dev](https://github.com/yuvrajk-dev) | [yuvrajk-dev.vercel.app](https://yuvrajk-dev.vercel.app)

## SUMMARY

JavaScript engineer specializing in React and Node.js full-stack development. Comfortable across the stack, from JWT-secured REST APIs and MongoDB data modeling to state-managed React UIs and AI API integrations.

## TECHNICAL SKILLS

### Languages

JavaScript (ES6+)

### Databases & Services

MongoDB, Mongoose, Supabase

### Frontend

React, Redux Toolkit, Zustand, React Router, React Flow, Tailwind CSS, DaisyUI, Motion.dev, HTML5, CSS3

### Tools & Deployment

Git, GitHub, Vercel, Render, Vite, Postman, VS Code

### Backend & APIs

Node.js, Express.js, RESTful API Design, Socket.IO, Axios, JWT, bcrypt

## PROJECTS

### DevTinder – Developer Networking Platform

React • Redux Toolkit • Tailwind CSS • DaisyUI • Node.js • Express.js • MongoDB • Mongoose

Live Demo: [devtinder-social.vercel.app](https://devtinder-social.vercel.app) | GitHub: [github.com/yuvrajk-dev/DevTinder-Frontend](https://github.com/yuvrajk-dev/DevTinder-Frontend) | [github.com/yuvrajk-dev/DevTinder-Backend](https://github.com/yuvrajk-dev/DevTinder-Backend)

- Designed a stateful connection-request system that prevents duplicate requests and filters already-connected or rejected profiles from the discovery feed.
- Engineered secure REST APIs with JWT authentication, HTTP-only cookies, bcrypt password hashing, input validation, and CORS.
- Built state-managed React interfaces for profile discovery, paginated developer feeds, connection requests, and accepted connections.

### Pipeline Studio – Visual Workflow Builder

React • React Flow • Zustand • FastAPI • Tailwind CSS • REST APIs

Live Demo: [pipeline-studio-ai.vercel.app](https://pipeline-studio-ai.vercel.app) | GitHub: [github.com/yuvrajk-dev/Pipeline-Studio](https://github.com/yuvrajk-dev/Pipeline-Studio)

- Built a drag-and-drop visual workflow editor supporting 9 reusable node types with centralized graph-state management for nodes, edges, and dynamic variable handles.
- Added a lightweight REST endpoint (FastAPI) that analyzes submitted graphs, returns node/edge counts, and detects circular dependencies via DAG validation.

### CineAI – AI-Powered Movie Discovery Platform

React • Redux Toolkit • Tailwind CSS • Supabase • TMDB API • OpenRouter

Live Demo: [cineai-web.vercel.app](https://cineai-web.vercel.app) | GitHub: [github.com/yuvrajk-dev/CineAI](https://github.com/yuvrajk-dev/CineAI)

- Integrated OpenRouter and TMDB APIs to convert natural-language prompts into personalized movie recommendations and enrich results with movie metadata.
- Implemented Supabase authentication with session persistence, protected routes, and user-profile creation. Built Redux-managed browsing across Now Playing, Popular, Top Rated, and Upcoming categories.

### TaskStack – Task Management Application

React • Tailwind CSS • Supabase • React Router

Live Demo: [taskstack-app.vercel.app](https://taskstack-app.vercel.app) | GitHub: [github.com/yuvrajk-dev/TaskStack](https://github.com/yuvrajk-dev/TaskStack)

- Built a Kanban board with native drag-and-drop across Planning, In Progress, and Done columns, with priority setting, editing, and validation.
- Secured per-user data with Supabase Authentication, protected routes, and Row Level Security policies.

## EDUCATION

### Bachelor of Science in Information Technology

Anugrah Narayan College

2022 – 2025

Patna, Bihar
