SUMMARY

React-focused Frontend / Full-Stack Developer with hands-on experience building and deploying responsive web applications using React, JavaScript, Node.js, Express.js, Supabase/PostgreSQL, and REST APIs. Built AI-enabled and data-driven applications using OpenRouter, Redux Toolkit, Zustand, React Flow, Supabase Auth, and Row Level Security.

TECHNICAL SKILLS

Languages

JavaScript (ES6+), HTML5, CSS3

Frontend

React.js, React Flow, Zustand, Redux Toolkit, React Router, Tailwind CSS, Motion.dev

Tools & Deployment

Git, GitHub, Vite, VS Code, Postman, Vercel, Render

Backend & Data

Node.js, Express.js, Socket.IO, Supabase (PostgreSQL, Auth, Storage, Row Level Security)

AI & APIs

REST APIs, OpenRouter, TMDB API

PROJECTS

CineAI – AI-Powered Movie Discovery Platform

React.js • Redux Toolkit • Tailwind CSS • Supabase • TMDB API • OpenRouter

Live Demo: cineai-web.vercel.app 🔗 | GitHub: github.com/yuvrajk-dev/CineAI 🔗

- Developed an AI-powered movie discovery application that converts natural-language prompts into personalized recommendations using OpenRouter.
- Implemented Supabase Auth with signup, login, session persistence, and protected React routes.
- Integrated TMDB REST APIs and built reusable Redux-managed UI components for movie discovery, trailers, carousels, and loading states.

Pipeline Studio – Visual Workflow Builder

React.js • React Flow • Zustand • Tailwind CSS • REST APIs

Live Demo: pipeline-studio-ai.vercel.app 🔗 | GitHub: github.com/yuvrajk-dev/Pipeline-Studio 🔗

- Built a visual workflow builder with React Flow, enabling drag-and-drop creation and connection of custom pipeline nodes.
- Used Zustand to manage graph state and integrated a REST backend that validates workflow submissions and detects DAG structures.
- Designed a responsive, component-driven UI with Tailwind CSS, focusing on smooth interactions and maintainable architecture.

TaskStack – Task Management Application

React.js • Tailwind CSS • Supabase • React Router

Live Demo: taskstack-app.vercel.app 🔗 | GitHub: github.com/yuvrajk-dev/TaskStack 🔗

- Built a Kanban task-management application with Planning, In Progress, and Done workflows plus drag-and-drop task movement.
- Implemented Supabase-backed CRUD operations with Auth and Row Level Security for per-user data isolation.
- Developed responsive React UI with persistent dark/light mode, client-side validation, reusable components, and modular architecture.

Portfolio Website 🔗

React.js • Tailwind CSS • Motion.dev • Socket.IO • Node.js • Express.js

Live Demo: yuvrajk-dev.vercel.app 🔗 | GitHub: github.com/yuvrajk-dev/portfolio 🔗

- Built an animated, responsive portfolio using React, Motion.dev, and reusable components.
- Implemented real-time cursor sharing using Socket.IO with a Node.js/Express backend.
- Optimized performance, accessibility, and responsive UX across devices.

EDUCATION

Bachelor of Science in Information Technology

Anugrah Narayan College

2022 – 2025

Patna, Bihar
